# Peugeot/Citroën FAP Tool

## PSA Diesel Particulate Filter Tool

Regenerates Diesel Particulate Filters

Resets ELOYS Additive Lights

Filter Replacement Function

Numerous Systems Covered

Supports Vehicles from 2000 on

Simple Push Button Operation

Handheld

No Need to Send Cars Away to the Dealer

Designed, Manufactured and Supported by SP Diagnostics in the UK

Modern diesel vehicles in the Peugeot / Citroën range are fitted with complex anti-pollution systems, these systems require servicing and resetting which can only be completed via diagnostics. The PSA FAP tool allows you to service Diesel Particulate Filter systems without sending the car to a main dealer.

The tool will reset the DPF Light after the filter has been replaced, reset the additive level after it has been topped up, and burn any particles that have clogged the filters (regeneration).
