Updateable
(return to SP Diagnostics)

Designed, Manufactured and Supported by
SP Diagnostics in the UK

The new VOLVO service reset tool has been designed to extinguish service lights for the range of Volvo vehicles including CAN vehicles. The reset tool has been developed with the ability to not only extinguish the dashboard service light but also the messages displayed on the Driver Information Module where applicable. The adapter included allows communication with the later CAN based vehicles and can also be used with the ACR4 product to give added functionality on various models.
